Abstracts

Nano Laser Particle Size Analyzers are instruments used to measure the size distribution of particles in a liquid or colloidal suspension. This technique is based on the principle that when particles are illuminated by a laser beam, they will scatter light in different directions due to their Brownian motion. By analyzing the intensity of the scattered light at different angles, information about the particle sizes can be extracted. At present, major global manufacturers include Malvern Panalytical, Beckman Coulter, OTSUKA Electronics, HORIBA and Anton Paar, etc. In 2022, the market share of the world's top five major manufacturers will exceed 70%. It is expected that industry competition will become more intense in the next few years, especially in the Chinese market.

The global Nano Laser Particle Size Analyzers market size was estimated at USD 75.4 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.60% during the forecast period.
