## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Nasal Irrigator competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Global nasal irrigator sales reached 41.12 million units in 2024, with an average selling price of \$9.35 per unit. Nasal irrigator raw materials include plastics (bottles, catheters, etc.), electronic components (core components of electric nasal irrigators), and silicone materials (nose nozzles, sealing rings). Plastic Parts: Bottles, nose plugs, and catheters are primarily made of medical-grade PP/PE/silicone. Domestic production capacity is sufficient, with a localization rate exceeding 90%, and price fluctuations are minimally correlated with crude oil prices. Electronic Components (Electric): Micro DC diaphragm pumps, PCBAs, lithium batteries, and Type-C connectors. Core pumps were previously dominated by Murata of Japan and TYCO of the United States, but domestic manufacturers (in Shenzhen and Dongguan) have now replaced them at a rate of 60%. Salt Packets/Consumables: 0.9 g or 2.7 g isotonic/hypertonic sea saline solution, registered as a Class II medical device, with a gross profit margin of up to 70% and high repurchase rate. Nasal irrigation has evolved from a clinical aid to a daily routine for the general public. The convergence of the three forces of "chronic disease prevalence, consumer awareness, and price reductions" is driving the nasal irrigation device market into a period of rapid expansion. China has achieved a high degree of localization in the upstream supply chain, while midstream manufacturing and brand expansion are accelerating simultaneously. Future competition will shift to "compliant registration, consumables subscription, and intelligent value-added." Companies with R&D, registration, and global channel integration capabilities are expected to reap the benefits of both volume and price increases. Nasal Irrigator manufacturers include Fly Cat Electrical Co., Ltd., Apon and Ninoo Biology etc. The top 3 companies hold a share of

more than 50%. North America takes up the largest sales market, with a share of nearly 50%, followed by Europe and China, with the share of about 24% and 12% respectively.

The global Nasal Irrigator market size was estimated at USD 385.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 18.20% during the forecast period.
