Report Overview:

Colors and flavors both play a critical role in the success or failure of any finished product. Colors are used as an additive for food development for making it more appealing and also balance out the possible color loss by improving the naturally occurring texture of the product. On the other hand, flavor additives impart flavor to the product along with offering some functional role to the product such as masking off-notes, improve excessive bitterness from natural ingredients such as fibers, certain proteins, vitamins, and minerals.

The Global Natural Food Colors and Flavours Market Size was estimated at USD 1742.67 million in 2023 and is projected to reach USD 2571.59 million by 2029, exhibiting a CAGR of 6.70% during the forecast period.
