Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Natural Food Greaseproof Paper competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Natural Food Greaseproof Paper is a type of paper designed to resist the absorption of oils and grease without relying on synthetic chemicals or coatings, such as fluorochemicals. Instead, it achieves its grease-resistant properties through natural materials, such as cellulose fibers, biodegradable plant-based additives, or physical treatments that alter the paper's structure to create a natural barrier. This eco-friendly alternative is commonly used in food packaging and wraps, offering both functionality and sustainability by being recyclable, compostable, and safe for direct food contact. Natural Food Greaseproof Paper is priced at approximately \$1,800 to \$2,200 per ton, with a gross profit margin between 20% and 30%. The upstream segment of the Natural Food Greaseproof Paper supply chain consists primarily of pulp producers, plant-based additive suppliers, mechanical treatment technology providers, and specialty chemical formulators that enable fiber modification. Paper mills integrate these inputs through refining, surface treatment, and barrier enhancement processes to produce grease-resistant grades with natural performance attributes. Downstream, converters transform the paper into wraps, bags, trays, and other functional packaging, which are then supplied to foodservice operators, quick-service restaurants, bakeries, and consumer goods companies. Distribution networks, recyclers, and composting facilities complete the chain by enabling market access and supporting sustainable end-of-life pathways.

The global Natural Food Greaseproof Paper market size was estimated at USD 249.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of

4.10% during the forecast period.
