Abstracts

Natural food usually refers to a type of food that maintains its natural properties to the greatest extent possible during the entire production, processing, and sales process, without or with minimal use of chemical synthetic substances such as pesticides, fertilizers, hormones, additives, etc. This type of food emphasizes full chain quality control from raw material acquisition to final product, in order to meet consumers' pursuit of health, safety, and environmental protection. According to the certification level, natural food is mainly divided into three categories: organic food, green food, and pollution-free food. According to the source of raw materials, it can be divided into plant-based natural food and animal based natural food. According to the processing method, it can be divided into primary processed products, deep processed products, and ready to eat products.The natural food market is showing a thriving trend worldwide. Improving health awareness is the fundamental driving force. With the improvement of living standards and changes in disease spectrum, consumers are increasingly aware of the close relationship between diet and health. The frequent occurrence of food safety incidents has also intensified public concerns about traditional food and led them to seek safer alternatives. The growth of income level provides an economic foundation for market expansion, policy support is an important driving force for industry development, and technological innovation promotes industrial upgrading from the supply side. Social and cultural factors cannot be ignored. The spread of trends such as vegetarianism and environmentalism has made more consumers pay attention to the environmental impact and ethical values of food. The widespread dissemination of healthy eating content on social media has also subtly changed the public's consumption concept. The global natural food market is mainly distributed in North America, Europe, and the Asia Pacific region, with North America occupying the largest market share, followed by Europe and the Asia Pacific region. The main market participants include Nestle, Danone, and others. They have a high market share and brand influence in the natural food industry.

Companies such as COFCO Group, Yihai Kerry, and Beidahuang Group hold a certain market share in the domestic market and enhance their competitiveness through continuous research and development of new products and market expansion. The main challenges in the current market are production costs and price barriers, certification systems and regulatory challenges, supply chain and channel bottlenecks, and insufficient consumer awareness and education. In the future, the market will maintain steady growth and present a parallel development path of high-end and mass market. Category innovation will become a new engine of growth. In addition to traditional agricultural products, emerging categories such as natural nutritional supplements, plant-based foods, and organic convenience foods are expected to grow rapidly. The breakthrough in agricultural production technology will fundamentally improve industrial efficiency, the trend of clean labeling in processing will be further strengthened, and digital technology will reshape the entire industry chain. The integration of online and offline channels will become the mainstream trend, and membership and subscription models show great potential. Brand building will pay more attention to value resonance. The tightening of industry regulation will become the norm, and policy support is expected to increase.

The global Natural Food market size was estimated at USD 25000.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 3.30% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Natural Food market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights. It examines market size, competitive landscape, emerging development trends, niche segments, key drivers and challenges, as well as conducts SWOT and value chain analyses.

The insights provided enable readers to understand the competitive dynamics within the industry and formulate effective strategies to enhance profitability and market positioning. Additionally, the report presents a clear framework for evaluating the current status and future outlook of business organizations operating in this sector.

A significant focus of this report lies in the competitive landscape of the global Natural Food market. It offers detailed profiles of major players, including their market shares, performance metrics, product portfolios, and operational status. This enables stakeholders to identify leading competitors and gain a nuanced understanding of market rivalry and structure.
