Abstracts

Natural gas for vehicles (NGV) refers to compressed natural gas (CNG) or liquefied natural gas (LNG) used as an alternative transportation fuel in internal combustion engines, primarily in commercial fleets such as buses, trucks, and waste collection vehicles, as well as in passenger cars in some markets; it is valued for its lower emissions of pollutants like nitrogen oxides and particulate matter compared to diesel or gasoline, as well as its potential cost savings depending on regional energy pricing, though adoption is influenced by infrastructure availability, vehicle conversion costs, and competition from other alternative fuels like electricity and hydrogen.
