NK cells, a type of immune cell, have received a lot of attention for their natural capacity to recognize and kill malignant cells. Advances in understanding NK cell biology and its interactions with Cancer have resulted in the development of new medicines that harness the potential of these cells. With the success of CAR-NK cell therapies in preclinical and early clinical trials, there is growing optimism about the ability of NK cell-based immunotherapies to treat a wide spectrum of cancer types. Another important driver for the NK Cell Therapeutics Market is the rising global prevalence of Cancer, combined with ongoing unmet medical needs in cancer treatment.
