## Abstracts

Natural oil resource utilization services refer to comprehensive development, processing, transformation, and application services centered around natural oil resources such as animal and vegetable oils. These services utilize physical refining, chemical modification, and biocatalysis to achieve efficient utilization and value enhancement of natural oils in the food, cosmetics, pharmaceutical, chemical, and energy sectors. Service content covers raw material screening and testing, oil refining and grading, fatty acid and ester derivative preparation, and technical support for biodiesel and functional oil production. Its core objective is to improve resource utilization, reduce environmental burden, and expand the application of renewable raw materials in the green industrial chain, thereby promoting the sustainable development and high-value-added utilization of natural oil resources. The downstream application areas of natural oil resource utilization services are extensive, mainly covering food processing, nutritional supplements, personal care products, pharmaceutical preparations, fine chemicals, and renewable energy industries. In the food and nutrition sector, natural oils are used in the production of functional edible oils, emulsifiers, and nutritional supplements. In the cosmetics and personal care industry, they are used as emollients, moisturizers, and base oils, serving as important raw materials for high-end skincare and haircare products. In the pharmaceutical and fine chemical sectors, oil resources are transformed into pharmaceutical excipients, surfactants, and high-end lubricants through processes such as esterification and hydrogenation. In the energy sector, natural oils are core raw materials for the production of biodiesel and bio-lubricants. Due to the high added value and prominent environmental attributes of natural oil products, the industry's overall gross profit margin is relatively considerable, generally around 37%.

The global Natural Oil Resource Utilization Service market size was estimated at USD
