Abstracts

A natural stone processing machine is a type of industrial equipment designed to cut, shape, polish, and finish natural stones such as granite, marble, limestone, and slate. These machines are used in the stone industry to transform raw stone blocks into finished products like tiles, countertops, slabs, and decorative items. The machines typically include functions for cutting, grinding, polishing, and sometimes engraving or carving, depending on the specific requirements of the stone being processed. Advanced models use computer numerical control (CNC) technology to ensure precise and intricate shaping, while other machines may focus on surface treatment or edge finishing.
