## Abstracts

The network security audit system is a comprehensive management platform that collects, analyzes, and records data from various devices, applications, and user behaviors within a network environment, enabling security incident tracing, compliance checks, and risk warnings. Its core functions include log auditing, behavioral analysis, compliance reporting, and incident tracing. The network security audit system industry chain encompasses suppliers of big data components and analytical algorithms upstream, product development and solution integration in the midstream, and enterprise users across various industries downstream. Global annual production capacity can reach tens of thousands of systems, using a project-based delivery model. Leading manufacturers have an annual delivery capacity of thousands of large systems. Due to the high degree of customization and the need for continuous algorithm optimization, its gross profit margin remains between 50% and 65%. The cybersecurity audit system market is being driven by the dual forces of strengthened global compliance regulations and increased demand for insider threat protection. Its development prospects are closely tied to the depth of digital transformation and security governance requirements, placing higher standards on system analysis accuracy and response efficiency. The North American market, leveraging its mature security analytics ecosystem and advanced technology R&D capabilities, continues to lead the technological direction of intelligent auditing. The European market, driven by stringent data protection regulations and cross-border business demands, maintains a steady flow of procurement for solutions that meet high-standard compliance requirements. The Asia-Pacific market, particularly China, demonstrates the strongest growth momentum through the world's largest digital transformation and the implementation of cybersecurity laws. It is rapidly becoming a major global hub for technological innovation and a market for large-scale applications.
