Abstracts

Industrial network switches are Ethernet switches used in the field of industrial control. Due to the network standards adopted, they have good openness and wide application; they can adapt to low temperature and high temperature, and have strong anti-electromagnetic interference, anti-salt spray, and strong shock resistance. Using the transparent and unified TCP/IP protocol, Ethernet has become the main communication standard in the field of industrial control. According to our research, the number of global connected IoT devices was about 14 billion, grew by 18% compared to 2021. The data released by the Office of the Central Cyberspace Affairs Commission shows that, by the end of 2022, China has built and opened a total of 2.3 million 5G base stations. 110 cities across the country have reached the gigabit city construction standards. Gigabit optical network has the ability to cover more than 500 million households. IPv6 scale deployment application is deeply promoted. The number of active users exceeds 700 million, mobile network IPv6 traffic accounted for nearly 50%. The total size of China's data center racks exceeds 6.5 million standard racks, with an average annual growth rate of more than 30% in the past five years.

The global Network Switch for IoT market size was estimated at USD 1240.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 7.80% during the forecast period.
