### Report Overview

Neurostimulation is a therapeutic activation of part of the nervous system using microelectrodes. The electrodes are used to interface with excitable tissue in order to either restore sensation, such as a cochlear implant for hearing, or control an organ, such as a heart pacemaker.

Neurostimulation technology improves the life quality of those who are severely paralyzed or suffering from profound losses to various sense organs. It serves as the key part of neural prosthetics for hearing aids, artificial vision, artificial limbs, and brain-machine interfaces. In the case of neural stimulation, mostly an electrical stimulation is utilized and charge-balanced biphasic constant current waveforms of capacitive coupled charge injection approaches are adopted. Alternatively, the transcranial magnetic stimulation has been proposed as a non-invasive method in which a magnetic field causes neurostimulation.

Neurostimulation devices are implantable devices that help in the therapeutic activation of the nervous systems. These devices deliver electrical stimulation to the brain and nervous systems for the treatment of various types of neurological disorders such as pain, epilepsy, Parkinson's disease, depression, obsessive-compulsive disorder, dystonia, and tremors. These devices target specific areas of the brain or spinal cord by blocking the pain messages before they reach the brain.

Global Neurostimulation Devices key players include Medtronic, Boston Scientific, St. Jude Medical (Abbott), etc. Global top three manufacturers hold a share over 75%.

North America is the largest market, with a share over 4%, followed by China, and Europe, both have a share about 4 percent.

In terms of product, Spinal Cord Stimulation (SCS) is the largest segment, with a share over 55%. And in terms of application, the largest application is Pain Management, followed by Parkinson's Disease, Epilepsy, Urinary and Fecal Incontinence, etc.

The Global Neurostimulation Devices Market Size was estimated at USD 5987.58 million in 2021 and is projected to reach USD 12758.58 million by 2028, exhibiting a CAGR of 11.41% during the forecast period.
