Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Neurotoxin-based Injectable Anti-aging Product competitive dynamics, regional economic interdependencies, and supply chain reconfigurations.Neurotoxin-based injectable anti-aging products are aesthetic formulations that use botulinum toxin to temporarily block neuromuscular transmission, thereby relaxing facial muscles and reducing the appearance of dynamic wrinkles caused by repetitive facial expressions. Popular brands include Botox (Allergan), Dysport (Ipsen), Xeomin (Merz), and domestic products like BTXA (Lanzhou Institute). These treatments are commonly used to address forehead lines, crow's feet, glabellar lines, and are also applied in contouring (e.g., jaw slimming) and hyperhidrosis management. Neurotoxins offer a minimally invasive, fast-acting, and effective solution, making them one of the most widely used tools in modern anti-aging and aesthetic medicine.The global botulinum toxin market is driven primarily by the increasing demand for aesthetic procedures and the growing acceptance of minimally invasive treatments. Rising consumer awareness of anti-aging solutions, coupled with the influence of social media and celebrity endorsements, has significantly boosted the use of botulinum toxin in cosmetic applications. In addition, expanding therapeutic indications—such as for chronic migraine, spasticity, and overactive bladder—are further fueling market growth, supported by ongoing clinical research and regulatory approvals.Despite strong demand, the botulinum toxin market faces challenges such as high treatment costs, especially in emerging economies, which can limit patient accessibility. Moreover, strict regulatory frameworks, risks of off-label use, and potential side effects—such as resistance due to neutralizing antibodies—pose constraints on market expansion. Competition from alternative aesthetic and therapeutic modalities,
