Report Overview

Next-generation dealer portals is an auto dealership management system or dealership management system (DMS), which will be a form of bundled management information system that is created particularly for automotive industry. It is used by car dealers and even by large machinery manufacturers, such as Caterpillar Inc for their dealerships, and is also adapted by boats, cars, bikes, power sports dealers. Next-generation dealer portals systems contain software that caters to the needs of sales, finance, inventory, parts and administration components to run the dealership, one of their functions also includes automating tax returns. Another form of next generation dealer portals is single-dealer platform (SDP), which is a software generally used by an investment bank. This software deals in the capital markets to handle trading and related services through web. The main function of a single-dealer platform is to integrate liquidity, pricing, and information from multiple sources and provide access to these information through a single user interface. It is thus both a delivery platform and an integration platform.
