Abstracts

Next Generation Operations Support Systems (OSS) and Business Support Systems (BSS) refer to modernized, cloud-native, and software-defined platforms that enable communication service providers (CSPs) to manage network operations, service delivery, and customer interactions more efficiently and flexibly. These systems incorporate advanced technologies such as artificial intelligence, machine learning, automation, and microservices architecture to support dynamic service orchestration, real-time analytics, and seamless integration with emerging 5G, IoT, and edge computing ecosystems, allowing CSPs to rapidly deploy new services, optimize network performance, enhance customer experience, and reduce operational costs in an increasingly competitive and complex telecommunications landscape.

The global Next Generation Oss And Bss market size was estimated at USD 5210.5 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 8.75% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Next Generation Oss And Bss market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights. It examines market size, competitive landscape, emerging development trends, niche segments, key drivers and challenges, as well as conducts SWOT and value chain analyses.

The insights provided enable readers to understand the competitive dynamics within the industry and formulate effective strategies to enhance profitability and market positioning. Additionally, the report presents a clear framework for evaluating the current status and future outlook of business organizations operating in this sector.
