The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on NFC Fruit Juice competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global NFC Fruit Juice production reached approximately 81,775 tons, with an average global market price of around US\$ 1,622 per ton. Gross margin is about 57%. The cost is 697 usd. Production Capacity is about 100,000-120,000 tons. NFC is the short version of Not From Concentrate. The upstream and downstream segments of NFC Fruit Juice's industrial chain may be summarised as follows: upstream comprises raw juice ingredient supply, encompassing fruit growers, orchards and fruit wholesalers providing fresh fruit materials, alongside agricultural inputs such as fertiliser and pesticide provision; Midstream encompasses production and processing stages, including juice extraction, cold chain transportation, pasteurisation, and bottling facilities, ensuring product quality and safety; downstream involves sales and distribution channels, such as supermarkets, convenience stores, e-commerce platforms, food service chains, and export trade, delivering finished juice to end consumers alongside brand marketing and after-sales services. The entire supply chain relies on the freshness of raw materials, processing technology, and the efficient operation of distribution channels.
