The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Nicotinamide Mononucleotide (NMN) Facial Mask competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. The Nicotinamide Mononucleotide (NMN) Facial Mask market refers to the segment of the skincare and facial mask industry in which NMN is positioned as a key active ingredient for anti-aging and skin vitality. NMN (nicotinamide mononucleotide) is a precursor of NAD⁺ and is recognized in cosmetic ingredient databases primarily as an antioxidant used in topical formulations. In NMN facial masks, this molecule is incorporated into sheet masks, hydrogel masks or cream/wash-off masks, usually in combination with collagen, hyaluronic acid, peptides and plant extracts, to claim benefits such as enhanced cellular energy metabolism, improved elasticity, hydration and reduction of fine lines. As a market, it includes any branded facial mask products that prominently feature NMN on the ingredient list, product name or marketing message and that are sold for regular home skincare routines or professional spa use. The Nicotinamide Mononucleotide (NMN) Facial Mask industry chain runs from upstream producers of cosmetic-grade NMN, auxiliary actives (collagen, hyaluronic acid, peptides, plant extracts), non-woven or hydrogel mask substrates and packaging materials, through midstream cosmetic formulators and OEM/ODM mask manufacturers, to downstream brand owners, online and offline beauty retailers, spas and end-consumers using the masks for premium anti-aging and moisturizing facial care. In 2024, global Nicotinamide Mononucleotide (NMN) Facial Mask production reached approximately 14.2 million units, with an average global market price of around US\$ 3.7 per unit. The global single-line production capacity ranges from 1 to 2 million units per year. The industry's gross profit margin is

approximately 30%-35%.

The global Nicotinamide Mononucleotide (NMN) Facial Mask market size was estimated at USD 52.54 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 18.70% during the forecast period.
