## Abstracts

A nitric oxide detection analyzer is a device used to measure the concentration of nitric oxide (NO) in exhaled breath. It is widely used in the diagnosis and monitoring of respiratory conditions, particularly in inflammatory diseases such as asthma. By assessing the levels of NO in exhaled air, physicians can better evaluate airway inflammation and adjust treatment plans accordingly. This non-invasive method is safe, quick, and helps enhance the accuracy of diagnosis and the effectiveness of respiratory disease management. Global Nitric Oxide Detection Analyzers key players include NIOX Group (Circassia AB), CAIRE, ECO PHYSICS AG, Bosch Healthcare Solutions and Bedfont Scientific, etc. Global top five manufacturers hold a share about 90%. The largest market is Europe, has a share over 40%, followed by Asia Pacific and North America, with around 22% and 35% market share respectively. In terms of product, Desktop type is the largest segment, with a share over 80%. And in terms of application, the largest application is Adults, has a share about 65%, followed by Children. In the medical field, the high incidence of respiratory diseases such as asthma and chronic obstructive pulmonary disease (COPD) has prompted doctors and researchers to seek more accurate diagnostic tools. As a non-invasive method for evaluating airway inflammation, the market demand for exhaled nitric oxide (FeNO) analyzers is growing, which can help optimize treatment plans and reduce unnecessary drug use. In terms of environmental monitoring, as global attention to air quality increases, governments and environmental organizations have established more stringent emission standards. This has prompted the industry to adopt more advanced NO detection technology to monitor NOx emissions during combustion to ensure compliance with regulations and reduce environmental pollution.

The global Nitric Oxide Detection Analyzers market size was estimated at USD 111.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of

15.00% during the forecast period.
