## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on N,N-Dimethylaminoethyl Methacrylate (DMAEMA) competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. N,N-Dimethylaminoethyl Methacrylate (DMAEMA) is a bifunctional monomer containing a tertiary amino group and an ester group. It has good water solubility and reactivity. Its chemical structure contains a methacrylic acid group and a dimethylaminoethyl group. DMAEMA is widely used in the synthesis of polymers, especially in the fields of coatings, petroleum, water treatment agents, etc. Due to its excellent thickening, film-forming and adhesion properties, DMAEMA is often used as a functional monomer and copolymerized with other monomers to improve material properties. As an important acrylic monomer, N,N-Dimethylaminoethyl Methacrylate (DMAEMA) not only has good water solubility and reactivity, but also has excellent functionality. In recent years, its application in many industries has gradually increased, showing good market potential. With the continuous growth of global demand for high-performance materials, the market prospects of DMAEMA are becoming brighter. Technological innovation and production process progress in the industry have gradually reduced the production cost of DMAEMA. China has dominated the low-end and mid-end markets with its expansion of production capacity and cost advantages. At present, the industry is also facing the dual challenges of environmental protection and cost. The price fluctuations of raw materials have a certain impact on production costs. The continuous changes in environmental protection laws and regulations also require companies to pay more attention to green chemistry and sustainable development in the production process, and promote the environmental protection upgrade of products.

The global N,N-Dimethylaminoethyl Methacrylate (DMAEMA) market size was estimated at USD 305.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.30% during the forecast period.
