Report Overview

No-clean active solder wire is a special welding material whose distinctive feature is that no cleaning process is required after welding. This product contains special activators, which not only help speed up the welding speed and improve the quality of welding, but also effectively isolate the air during the welding process, prevent oxidation of the surface of the welded object, and ensure smooth progress of the welding. After welding with no-clean active solder wire, there is very little residue on the edge of the solder joint, and there is almost no need for cleaning, which greatly improves the efficiency and convenience of welding work.
