Report Overview

A No Glow Trail Camera, also known as a Blackout or Invisible Flash Trail Camera, is a type of wildlife or security camera designed to capture images and videos without emitting visible light. Unlike traditional trail cameras that use white or red infrared flashes, No Glow cameras utilize infrared LEDs that are not visible to the human eye or most animals. This feature makes them ideal for capturing nocturnal activity without alerting or startling the subjects being observed. As a result, they are commonly used by hunters, researchers, and property owners for discreet wildlife monitoring and security surveillance.
