Abstracts

NOA is a vehicle driving assistance system designed to help drivers drive and navigate vehicles more easily under specific conditions. Through NOA, users can achieve point-to-point navigation assisted driving function within a specific road range. Vehicles can wait for traffic lights, change lanes, yield lanes, and ultimately reach their destination without anyone taking over. The NOA market is developing rapidly, but contrary to this, most high-speed NOAs still rely on high-precision maps, and there is still a lot of room for cost reduction increment. However, there are still many difficulties in the large-scale application of urban NOAs. 2023 is considered the "first year of urban NOA", with a few leading car companies starting to focus on urban NOA, while most car companies are entering a new cycle of popularizing high-speed NOA. The scale of NOA remains the main theme of the market. From the current trend of technological development, the NOA function has shifted from high-speed NOA to urban NOA, and urban map free NOA has become the next stage of technological demand. At present, leading intelligent driving companies such as Huawei, Xiaopeng, and Ideal are vigorously promoting urban map free NOA technology to meet users' more intelligent and convenient driving needs.

The global NOA Intelligent Driving Solution market size was estimated at USD 8388.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 28.40% during the forecast period.
