Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Non-ionic Polymeric Dispersants competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Non-ionic Polymeric Dispersants are a class of additives based on polymers that stabilize the uniform dispersion of solid particles in liquid media through steric hindrance and interfacial wetting. Their molecular structure does not contain ionic hydrophilic groups. Instead, they rely on lipophilic segments for compatibility with solvents and solid-philic segments for adsorption on the particle surface to form a stabilizing layer, thereby preventing particle agglomeration or sedimentation. In 2024, global production was estimated to be approximately 760,000 tons, with an average selling price of US\$5,913 per ton.

The global Non-ionic Polymeric Dispersants market size was estimated at USD 4490.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 3.00% during the forecast period.
