The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Non-Leakage Compression Garbage Truck competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global sales of non-leakage compression garbage trucks are expected to reach approximately 37,000 units, with an average price of approximately \$41,500 per vehicle. Non-leakage compression garbage trucks are a type of urban sanitation vehicle that has been comprehensively optimized in terms of sealing structure, hydraulic system anti-seepage, sewage collection, and secondary sealing technology.
