## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Non-PFAS Anti Drip Additives competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global Non-PFAS Anti Drip Additives production reached approximately 22.1 kilotons with an average global market price of around US\$9,600 per ton. Single-line annual production capacity averages 3,000 tons with a gross margin of approximately 22%. The supply chain analysis of PFAS-free anti-drip agents indicates that the upstream is primarily concentrated in the production of environmentally friendly mineral and organic chemical raw materials. Midstream, additive manufacturing companies supply approximately 60% of their products to the wire and cable, as well as electrical and electronic industries, with 20% used in transportation, and the remaining 20% allocated to construction and other sectors. Downstream consumption is experiencing a steady annual growth rate of about 3%, reflecting the market's increasing demand for environmentally friendly anti-drip agents. Non-PFAS Anti Drip Additives are innovative compounds designed to prevent dripping during the extrusion or molding of plastics, without relying on perfluoroalkyl substances (PFAS) which are known for their environmental and health concerns. These additives are formulated to maintain the flowability of the molten polymer while effectively suppressing the formation of droplets that can compromise the integrity and safety of the final product. By eliminating PFAS, they offer a more sustainable alternative that reduces environmental impact and addresses health risks, all while ensuring a smoother manufacturing process and a cleaner production environment.

The global Non-PFAS Anti Drip Additives market size was estimated at USD 213.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of

6.50% during the forecast period.
