Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Non-Phthalate Petrochemical-based Plasticizers competitive dynamics, regional economic interdependencies, and supply chain reconfigurations.Non-Phthalate Petrochemical-based Plasticizers are chemical additives derived from petroleum feedstocks that provide flexibility, durability, and processability to polymers without using phthalates. Common types include adipates, citrates, trimellitates, and sebacates, which are primarily used in PVC and other polymer applications. These plasticizers are designed to meet regulatory and health safety standards, reducing risks associated with phthalate exposure. They are widely applied in medical devices, toys, packaging, construction materials, and consumer goods, offering comparable performance to traditional phthalates in terms of flexibility, low-temperature properties, and chemical resistance, while addressing growing environmental and health concerns.In 2024, global sales reached approximately 2,521 kilotons, with an average global market price of around USD 1,856 per ton.

The global Non-Phthalate Petrochemical-based Plasticizers market size was estimated at USD 4680.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 3.10% during the forecast period.
