## Abstracts

Non-powered respirators are personal protective equipment designed to protect the wearer from inhaling harmful airborne particles, gases, vapors, or fumes. Unlike powered air-purifying respirators (PAPRs), which use a motorized fan to assist with airflow, non-powered respirators rely on the wearer's breathing and the filter or cartridge system to provide protection. Global key players of Non-powered Respirators include Uvex Safety Group, 3M, DACH Schutzbekleidung, etc. The top three players hold a share over 41%. In terms of product type, Full Face Masks is the largest segment, occupied for a share of 53%. In terms of application, Industrial has a share about 70 percent.

The global Non-powered Respirators market size was estimated at USD 7425.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.00% during the forecast period.
