### Report Overview

Non-separable double row angular contact ball bearings have a high limit speed, can bear radial load and axial load at the same time, and can also bear pure axial load, and its axial load capacity is determined by the contact angle. The higher the axial load capacity, the smaller the contact angle and the smaller the axial load. Non-separable double-row angular contact ball bearings can limit the bidirectional axial displacement of the shaft or housing, and have better rigidity than single-row bearings.
