Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Non-support Rack competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Non-support Rack is a simplified agitator support structure where the agitator shaft is entirely supported by the reducer's output shaft, eliminating the need for additional bearing supports inside the vessel or frame.
