Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Nuclear Decommissioning Robot competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. The nuclear decommissioning robot is a special robot system designed for the decommissioning of nuclear facilities (such as nuclear power plants, nuclear laboratories, nuclear fuel processing plants, etc.), which has the ability to perform tasks such as dismantling, cleaning, detection, and transportation in extreme environments such as strong radiation, high temperature, high pollution, and confined space. Its core goal is to replace manual operations, reduce the risk of radiation exposure to personnel, and improve decommissioning efficiency and safety. In 2024, global Nuclear Decommissioning Robot production reached approximately 870 units, with an average global market price of around US\$ 350k per unit. The nuclear decommissioning robot market is expanding rapidly along with the global nuclear facility decommissioning trend, with unit prices varying significantly depending on function: basic inspection models are around US\$50,000 to US\$200,000, mid-to-high-end demolition/underwater models are US\$200,000 to US\$1 million, and customized autonomous robots are over US\$1 million. Benefiting from technological cost reduction and a surge in decommissioning demand (more than 200 reactors are expected to be decommissioned before 2030), autonomous robots and underwater equipment are the core of growth, with Asia (especially China and Japan) and Europe contributing the majority of the incremental growth, but adaptability to extreme environments, high costs and lagging standards remain key challenges.

The global Nuclear Decommissioning Robot market size was estimated at USD 305.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of

12.80% during the forecast period.
