Zirconia is a non-toxic, odorless white solid that is insoluble in water, hydrochloric acid, and dilute sulfuric acid (except for hot concentrated H₂SO₄, HF, and H₃PO₄); The chemical properties are not active, and the excellent characteristics of high melting point, high resistivity, high refractive index, and low thermal expansion coefficient make it widely used. Mainly used as raw materials for metal zirconium and its compounds; Zirconium bricks, zirconium tubes, crucibles, etc. used for melting daily ceramics, refractory materials, and precious metals; Thermal barrier coatings on aviation and industrial gas turbines, etc. Nuclear grade zirconia has important applications in the nuclear industry, such as being used as a structural material and cladding material in nuclear reactors.
