The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Nuclear Power Lighting competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global nuclear power lighting production reached approximately 140,000 units, with an average global market price of around US\$ 2,000 per unit. In 2024, the global's total production capacity of nuclear power lighting reached 190,000 units. The industry average gross profit margin of this product reached 13%. Nuclear power lighting refers to lighting systems designed specifically for locations exposed to radiation, high temperatures, high humidity, or corrosive environments, such as nuclear power plants, nuclear fuel processing facilities, nuclear research institutions, and nuclear medicine facilities. These lamps must be resistant to radiation, high temperatures, explosions, and corrosion. Their core value lies in providing safe, stable, and long-lasting lighting support for the construction, operation, and maintenance of nuclear power plants. In particular, during accidents, they ensure emergency lighting in critical areas and safe evacuation of personnel, providing a crucial foundation for the safe operation of nuclear power plants. The upstream of the nuclear power lighting industry chain is the supply of raw materials and core components, including LED chips, special heat dissipation materials, driver power supplies, and key materials to ensure radiation resistance and sealing; the midstream is the research and development, design and manufacturing of lighting fixtures, which are produced by professional manufacturers; the downstream is directly used in various scenarios of nuclear power plants, and its demand is directly driven by the construction, operation and maintenance of nuclear power plants and safety regulations.

The global Nuclear Power Lighting market size was estimated at USD 289.0 million in
