The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Nurse Holding PDA competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. By 2024, global production of Nurse Holding PDA will reach 603,000 units, with an average selling price of \$1,000 per unit. A nurse's handheld PDA (Personal Digital Assistant) is a portable smart terminal designed specifically for clinical nursing scenarios. It integrates barcode/QR code scanning, RFID recognition, a touch screen, wireless communication, and data collection and processing. This device typically integrates with a customized nursing information system (NIS) and can be integrated with a hospital information system (HIS) and electronic medical record system (EMR) to facilitate operations such as patient identification, order execution, medication verification, nursing records, vital sign entry, and task scheduling. Nurses can use the PDA to collect and interact with data at the bedside or within the ward at any time, significantly improving nursing efficiency, reducing errors, and enhancing patient safety management. Some high-end models also support voice interaction, GPS positioning, and video calling, making them key tools for smart wards and mobile nursing systems. The upstream and downstream supply chain for nurse handheld PDAs encompasses several key links: Upstream, core components are provided by a range of leading global suppliers, including BOE, AUO, and LG Display for touchscreen and display modules; Zebra, Honeywell, and Newland provide barcode scanning modules; Impinj, NXP, and Alien Technology supply RFID components; communication chips are provided by Qualcomm, Espressif, and Quectel; main control chips come from STMicroelectronics, Texas Instruments, and Rockchip; and batteries and power management are provided by ATL, BYD, and Jinshengyang. Downstream, the products are primarily targeted at large hospital groups such as Union Hospital and West China Hospital, as well as elderly care facilities such as Taikang

Home, United Family Healthcare, and Genesis Healthcare. Sales and distribution channels rely on pharmaceutical distributors such as Sinopharm Group, McKesson, and Cardinal Health. System integration is provided by healthcare information technology service providers such as Neusoft Medical, Winning Healthcare, Cerner, and Epic Systems, completing overall deployment and platform integration, forming a complete and closed-loop supply chain.
