Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on O-Phenylphenoxyethyl Acrylate (OPPEA) competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. O-phenylphenoxyethyl acrylate (OPPEA) is an organic compound with the chemical formula $C_{15}H_{14}O_3$, belonging to the class of acrylate compounds. It has a phenyl group and a phenoxy group connected to an ethyl side chain, and this structure gives it high reactivity and good UV stability in the synthesis of polymer materials, thereby improving the weather resistance and durability of synthetic materials. The upstream of the industry chain mainly consists of aromatic and acrylic raw materials, while downstream applications cover high-value-added fields such as UV/LED curable coatings and inks, and high-refractive-index optical coatings and lenses. Global sales in 2024 were approximately 12,000 tons, with an average market price of approximately US\$5,300 per ton. Single-line production capacity varies due to differences in production processes and investment scale, with industry gross profit margins ranging from 20% to 30%. OPPEA, a high-performance aromatic acrylate monomer, has garnered widespread attention in the UV-curable coatings and optical adhesives industries due to its high refractive index, excellent resistance to yellowing, low shrinkage, and good optical transparency. OPPEA occupies a mid-to-high-end segment of the UV-curable resin monomer market. Compared to conventional phenoxyethyl acrylates, OPPEA, containing o-phenyl substituents, exhibits higher molecular polarity and stronger dispersibility, significantly improving the heat resistance and optical properties of coatings. Therefore, it is gradually replacing traditional products in high-value-added applications such as optical lenses, LED encapsulation adhesives, and 3D printing resins.

The global O-Phenylphenoxyethyl Acrylate (OPPEA) market size was estimated at USD 63.6 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.60% during the forecast period.
