Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on OBD Locator competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, the global production of OBD locators will reach 9.55 million units, with an average selling price of US\$60 per unit. An OBD locator is an intelligent positioning and data collection device that plugs into a vehicle's OBD port. It not only features GPS/Beidou positioning and 4G/3G/2G communication, but also provides real-time readings of vehicle status information such as mileage, speed, fuel consumption, and fault codes. Its advantages lie in its easy installation (plug-and-play) and diverse functionality, enabling applications such as vehicle anti-theft tracking, fleet management, financial risk control, used car inspection, and insurance monitoring. Due to its direct connection to the vehicle's ECU (Engine Control Unit), the OBD locator has become a crucial terminal device for intelligent vehicle management and the Internet of Vehicles (IoT). The upstream provides key chips and modules, structural parts and PCB/PCBA processing for the OBD locator industry - including satellite positioning modules (GNSS, such as u-blox, Quectel, Sierra Wireless), cellular communication modules (4G/LTE, such as Quectel, Fibocom, Telit, Simcom), main control and SoC (STM, NXP, Qualcomm, etc. for T-BOX/high-end terminals), power management and storage devices (eMMC/NOR: Samsung, Micron, Winbond), as well as antennas and RF components (such as Yageo, Johanson, Murata) and other core components; the midstream is responsible for OEM/ODM manufacturers for whole-machine integration, firmware development, protocol/platform docking and certification testing; downstream users such as fleets, logistics, leasing, online car-hailing, insurance and regulatory agencies obtain data services such as positioning, vehicle condition and remote operation and maintenance through a closed loop of equipment-connection-platform-service.

The global OBD Locator market size was estimated at USD 573.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 12.60% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global OBD Locator market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights.
