Report Overview

Occupational Medicine is a concept of providing medical assistance and other healthcare services to the workers or employees focused on prevention, assessment, treatment and resolution of health conditions caused by the workplace environment. Occupational medicine protects workers from diseases and injuries as the employers regularly provide services such as health check-up, diagnosis and monitoring etc. as per the regulatory policies. It reduces the burden of healthcare expenditure and increase productivity as the workers are provided proper training and assistance for both prevention and treatment of any disease or injury. The occupational medicine specialists are trained to evaluate the origin of injury and illness so that treatment could be earlier and better. These specialists also provide training and assistance through education programmes on workplace hazards and confirming workplace compliance with regulatory rules and safety norms.
