Abstracts

Odor eliminator concentrates are specialized liquid formulations designed to neutralize and eliminate malodors at the molecular level, rather than merely masking them with fragrances, typically through the use of active ingredients such as enzymes, oxidizers, or specific chemical compounds that bind to and break down odor-causing molecules across a diverse range of sources including organic waste, smoke, pet accidents, and cooking smells; these products are distinguished by their high potency and efficiency, requiring dilution with water before application via spray bottles, foggers, or cleaning equipment, making them a versatile and cost-effective solution for both household and commercial use in settings ranging from homes and vehicles to hospitality, healthcare, and restoration industries.
