Abstracts

Off-campus medical education refers to educational activities for medical knowledge transmission, skill training, and clinical practice conducted outside traditional medical institutions such as medical schools and hospitals. It includes online courses, remote clinical training, community health service practice, corporate collaborative training, overseas study programs, etc., aiming to supplement campus-based education through diversified scenarios and cultivate medical students' clinical thinking, practical abilities, and interdisciplinary collaboration literacy. This model typically relies on information technology, simulation equipment, or real community medical settings to break through time and space constraints and integrate theory with practice.

The global Off-campus Medical Education market size was estimated at USD 24575.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 18.10% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Off-campus Medical Education market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights. It examines market size, competitive landscape, emerging development trends, niche segments, key drivers and challenges, as well as conducts SWOT and value chain analyses.

The insights provided enable readers to understand the competitive dynamics within the industry and formulate effective strategies to enhance profitability and market positioning. Additionally, the report presents a clear framework for evaluating the current status and future outlook of business organizations operating in this sector.

A significant focus of this report lies in the competitive landscape of the global Off-
