Report Overview:

Crude oil prices have eased in the past few months and are enough to support the demand for oilfield equipment in the industry. However, the impact of rise in prices have not been universal, with latest development suggesting a surge in the US onshore output (mainly from the shale reserve) and comparatively less activity elsewhere, especially in offshore. The decline in crude oil prices has forced the oil & gas companies to invest in technology to reduce the breakeven prices and change their strategy, which has helped several marginal projects to become viable. As the crude oil prices are increasing and has already crossed USD 70 per barrel mark in May 2018, the upstream investment is expected to grow significantly and bring several projects online, thereby, driving the market.

The Global Oil Field Equipment Market Size was estimated at USD 80.77 million in 2023 and is projected to reach USD 98.71 million by 2029, exhibiting a CAGR of 3.40% during the forecast period.
