Abstracts

A flexible pipe is made up of several different layers. The main components are leakproof thermoplastic barriers and corrosion-resistant steel wires. The helically wound steel wires give the structure its high-pressure resistance and excellent bending characteristics, thus providing flexibility and superior dynamic behaviour. This modular construction, where the layers are independent but designed to interact with one another, means that each layer can be made fit-for-purpose and independently adjusted to best meet a specific field development requirement. The major players in global Flexible Pipes for Oil and Gas market include Technip, GE Oil & Gas (Wellstream), National Oilwell Varco (NKT Flexibles), etc. The top 3 players occupy about 85% shares of the global market. Europe and Middle East & Africa are main markets, they occupy about 55% of the global market. Risers is the main type, with a share about 80%. Offshore is the main application, which holds a share about 70%.

The global Oil and Gas Flexible Pipe market size was estimated at USD 6245.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 7.30% during the forecast period.
