## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on OLED Etching Equipment competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. OLED etching equipment is a critical tool used in the patterning of organic emissive layers and metal electrodes during OLED panel manufacturing. Key systems include dry etching tools (plasma etching, reactive ion etching, RIE), photolithography-aligned etching systems, and associated automation and inspection modules. Upstream inputs include high-purity process gases (Ar, O<sub>2</sub>, N<sub>2</sub>), etching chemicals, photoresists and masks, vacuum and plasma subsystems, precision optical and mechanical components, and control electronics. Downstream customers comprise OLED panel manufacturers, smartphone and wearable OEMs, TV manufacturers, and module assembly companies. These tools are essential for high-resolution small-size flexible OLED panels and medium-to-large rigid OLED displays. In 2024, the global annual production capacity of OLED etching equipment is estimated at 1,000 units, with actual shipments around 658 units. The average selling price per unit ranges from USD 2.36 million, with high-end ALD-integrated etching lines exceeding USD 10 million. Manufacturing gross margins are approximately 20%-35%. Japan, South Korea, the U.S., and China dominate the high-end market. Key technologies such as high-precision RIE/ICP systems remain technologically challenging, while domestic Chinese manufacturers are gradually increasing market presence. With the expansion of flexible OLED and high-resolution small panels, demand for OLED etching equipment continues to grow, alongside challenges in yield, component supply, and process optimization.

The global OLED Etching Equipment market size was estimated at USD 1553.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.80%

during the forecast period.
