## Abstracts

An On-site Weighbridge Calibration Service provides authoritative calibration, testing, and verification of weighbridges directly at the user's location without requiring transport to a workshop. This service ensures accurate, legally compliant weighing systems by using mobile calibration rigs or test trucks loaded with certified weights traced to national standards (e.g., UKAS/ISO17025). Experienced engineers conduct procedures including zero-point checks, span (maximum capacity) validation, linearity testing, eccentricity verification, and load-cell integrity assessments. These services are essential for "legal-for-trade" weighbridges in sectors like logistics, manufacturing, agriculture, and waste management, where incorrect weight measurements can lead to regulatory fines or financial losses. Many providers also offer preventative maintenance, repairs, software support, and calibration contracts to minimize downtime and ensure long-term reliability.

The global On-site Weighbridge Calibration Services market size was estimated at USD 396.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.70% during the forecast period.
