## Abstracts

One-way degassing valves are also called as freshness valves, aroma valves or coffee valves. They are designed to allow pressure to be released from an airtight package while not allowing external atmosphere (i.e. air with 20.9% O<sub>2</sub>) to enter the package, which are critical in preserving the coffee from losing its aroma or freshness. These are proved to be the best for degassing of CO<sub>2</sub> while not letting the oxygen, moisture or any contaminants to enter in bulk bags or pouches. The one-way degassing valve market is in a state of sustained growth worldwide, with companies such as CCL Industries, Goglio S.p.A., Plitek, Wipf and Syntegon having significant market influence in this field, which together account for more than 50% of the global market share. As consumers' requirements for product quality and packaging functionality increase, these leading manufacturers continue to promote technological progress and optimize product performance to maintain their market dominance.

The global One-Way Degassing Valve market size was estimated at USD 175.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.70% during the forecast period.
