## Abstracts

### Report Overview

Online auctions are home to a wide range of vehicles for sale, and many of these models include damaged and light damaged cars. The exact nature of the damage in question can vary between technical, electronic or body damage, and can range from light to severe. Much of stock includes accident damaged cars that have been involved in road collisions or similar impacts. For the most lightly damaged cars, these accidents may only have affected the paint or bodywork, whereas more serious collisions could have lasting effects on the powertrain or underlying structure of the vehicle. A very small minority may include flood or fire damaged cars. While certain customers, such as first time buyers, might not find much use for these sorts of vehicles, damaged cars can be an invaluable source of spare parts for customers with more specialist mechanical experience. This type of vehicle can also encompass damaged repairable cars, which can be restored to full working condition.

The global Online Car Auctions market size was estimated at USD 15000 million in 2023 and is projected to reach USD 111758.71 million by 2032, exhibiting a CAGR of 25.00% during the forecast period.

North America Online Car Auctions market size was estimated at USD 5763.15 million in 2023, at a CAGR of 21.43% during the forecast period of 2024 through 2032.
