Abstracts

Online auctions are home to a wide range of vehicles for sale, and many of these models include damaged and light damaged cars. The exact nature of the damage in question can vary between technical, electronic or body damage, and can range from light to severe. Much of stock includes accident damaged cars that have been involved in road collisions or similar impacts. For the most lightly damaged cars, these accidents may only have affected the paint or bodywork, whereas more serious collisions could have lasting effects on the powertrain or underlying structure of the vehicle. A very small minority may include flood or fire damaged cars.While certain customers, such as first time buyers, might not find much use for these sorts of vehicles, damaged cars can be an invaluable source of spare parts for customers with more specialist mechanical experience. This type of vehicle can also encompass damaged repairable cars, which can be restored to full working condition.Automotive is a key driver of this industry. According to data from the World Automobile Organization (OICA), global automobile production and sales in 2017 reached their peak in the past 10 years, at 97.3 million and 95.89 million respectively. In 2018, the global economic expansion ended, and the global auto market declined as a whole. In 2022, there will wear units 81.6 million vehicles in the world. At present, more than 90% of the world"s automobiles are concentrated in the three continents of Asia, Europe and North America, of which Asia automobile production accounts for 56% of the world, Europe accounts for 20%, and North America accounts for 16%. The world major automobile producing countries include China, the United States, Japan, South Korea, Germany, India, Mexico, and other countries; among them, China is the largest automobile producing country in the world, accounting for about 32%. Japan is the world"s largest car exporter, exporting more than 3.5 million vehicles in 2022.
