Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Open Bluetooth Headset competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global production of Open Bluetooth Headsets reached 25.92 million units, with an average selling price of \$85.71 per unit and a gross profit margin of 40.35%. Open Bluetooth Headsets refer to headphones with an open design that do not fit inside the ear and do not obstruct or cover the ears. Compared to traditional closed or semi-closed headphones, Open Bluetooth Headsets offer higher wearing comfort, greater openness, and excellent listening performance, making them the most popular headphone product today. The advantage of Open Bluetooth Headsets lies in their open design, allowing wearers to hear some external sounds, such as ambient noise and other people's voices. This design allows wearers to enjoy music without completely isolating themselves from external sounds. Furthermore, Open Bluetooth Headsets offer better breathability, making them more comfortable to wear and suitable for extended use. The upstream components of Open Bluetooth Headsets mainly include the main control chip, power management chip, memory chip, battery, printed circuit board/flexible circuit board (PCB/FPC), and acoustic components. Among these, the main control chip, battery, and PCB/FPC account for the highest cost, each approximately 15%. Chip manufacturers include Qualcomm, Analog Devices, Sony, Dialog Semiconductor (Renesas), Airoha Technology (MediaTek), Actions Semiconductor, Realtek Semiconductor, Zhongke Lanxun, Hengxuan Technology, and JL Technology. Global core manufacturers of Open Bluetooth Headsets include Shokz, Bose, Oladance, Sony (Ambie), and NANK, with the top five holding approximately 55% of the global market share. North America is the largest market, accounting for approximately 58%, followed by Asia Pacific and Europe, with 20% and 20% market share respectively. In terms of

product type, bone conduction headphones are the largest segment, accounting for 68% of the market share. Downstream applications are primarily for adults, accounting for approximately 99% of the market share. Market Trends: Open Bluetooth Headsets will integrate more TWS functions, such as active noise cancellation, head tracking, and real-time translation, evolving into "smart life assistants." AI technology empowerment (such as voice assistants and sound quality optimization) has become a new focus of competition, with companies like Edifier already filing related algorithm registrations. Market segmentation deepens: Sports scenarios: Shokz strengthens its sports attributes by collaborating with professional athletes. Children's market: Brands like Xiaotiancai launch children's Open Bluetooth Headsets with safety positioning functions. Business scenarios: Ear clip designs like Huawei FreeClip meet the needs of extended wear. Ecosystem integration and cost-effectiveness strategy: Mobile phone manufacturers like Huawei and Xiaomi improve user experience through ecosystem integration (such as multi-device collaboration) while seizing market share with cost-effective strategies.

The global Open Bluetooth Headset market size was estimated at USD 2222.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 8.30% during the forecast period.
