## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Optical Mouse Sensor competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, the global production of optical mouse sensors was approximately 600-700 million units, with an average selling price of approximately US\$0.8-2.5 per unit and a gross profit margin of approximately 30%. Single-line production capacity was approximately 6 million-20 million units per year. An optical mouse sensor is a single chip integrating a CMOS image sensor and a digital signal processor. It accurately measures the direction and distance of movement on a two-dimensional plane by continuously capturing images of the surface beneath it and using the built-in processor to perform digital image correlation calculations. The upstream of the optical mouse sensor industry is mainly the semiconductor supply chain, including wafer foundries, packaging and testing plants, and optical lens suppliers; the midstream consists of sensor design companies responsible for core chip design, algorithm development, and system integration; and the downstream comprises various mouse brand manufacturers, with products ultimately used in personal computers, e-sports games, and professional office peripherals. The demand fundamentally stems from the stable existing market of global personal computers and the high-end trend brought about by the booming e-sports industry. As a core component of human-computer interaction, it drives mouse products to iterate towards higher precision, lower latency, and stronger reliability to meet diverse control needs from daily office work to professional e-sports.

The global Optical Mouse Sensor market size was estimated at USD 960.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.00% during the forecast period.
