Abstracts

A2 milk is a variety of cows' milk that mostly lacks a form of β -casein proteins called A1, and instead has mostly the A2 form. Since The a2 Milk Company launched A2 milk products, A2 milk is being marketed as a healthier choice compared to regular milk. Organic A2 milk has a longer shelf life than regular milk. It is also high in Omega-3 fatty acids, and comes from drug-free, open pasture cows. The major players in global A2 Milk market include The a2 Milk Company, GCMF (Amul), Freedom Nutritional, etc. The market concentration rate is high, and the top 1 player occupies about 85% shares of the global market. Asia Pacific is the main market, and occupies about 90% of the global market. Whole A2 Milk is the main type, with a share about 70%. Powdered Milk is the main application, which holds a share about 50%. From the perspective of major market participants, before 2017, the A2 milk market was almost monopolized by The a2 Milk Company, which represented a fast-growing dairy company through product differentiation, and was effective in consumer perception through product characteristics. Established a high-end brand image. Due to the unique positioning of the product, A2 Milk has received positive market response, and both revenue and profit scale have achieved rapid growth. The a2 Milk Company is one of the fastest growing dairy companies in the world. Currently, only 30% of cows produce milk containing only A2 protein, so pure A2 protein source milk is particularly precious.

The global Organic A2 Milk market size was estimated at USD 1482.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 7.80% during the forecast period.
