Abstracts

Organic cassava starch is a natural carbohydrate extracted from the root of the cassava plant (*Manihot esculenta*) through a process that avoids the use of synthetic chemicals, pesticides, or genetically modified organisms, making it a clean-label, gluten-free, and non-GMO alternative to conventional starches used across food, pharmaceutical, and industrial applications. It serves as a key thickening, stabilizing, and texturizing agent in products such as sauces, soups, baked goods, and confectionery, while also finding use in biodegradable packaging, adhesives, and as a filler in tablets due to its binding properties and sustainability credentials.
