Abstracts

Oriented Textured Yarn (OTY) refers to a specialized category of synthetic yarn, primarily made from polyester or polyamide, which undergoes a mechanical texturing process to introduce crimps, loops, or coils along the filament, enhancing its elasticity, bulkiness, and dimensional stability; this yarn is characterized by its molecular orientation achieved through precise drawing and heat-setting processes, resulting in improved tensile strength, uniformity, and dye affinity, making it suitable for applications requiring both stretch and durability, such as in sportswear, hosiery, upholstery, and automotive textiles, where it provides a balance of comfort, resilience, and aesthetic appeal without the need for elastane blends in many cases.

The global Oriented Textured Yarn market size was estimated at USD 1050.0 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 4.50% during the forecast period.
